

FSI (FM Solutions) Limited

Concept™ and CAD Connect™

Introduction

FSI's CAD Connect™ module offers Concept™ system users the opportunity to integrate their AutoCAD expertise with their Concept™ database.

The result is a two-dimensional facilities management view equipping both user and organisation with up-to-date details of space functionality/ownership, asset positioning/tracking and personnel positioning.

CAD Connect™ is currently available for use with Concept™ SQL/500 and requires either AutoDesk AutoCAD 2002/2004 or AutoDesk Architectural Desktop 3.3 and above as a CAD platform.

Target Audience

This one day training course is ideally suited for Concept™ users who would like to fully understand how the Concept™ CAD Connect module allows integration with AutoCAD.

Course Content

- System Security within Concept™
- Buildings and Locations within Concept™
- Asset Register and set-up considerations within Concept™
- Personnel Manager within Concept™
- Concept™ CAD Connect™ – Logging in
 - Introduction to Tools
 - Opening a drawing
 - Synchronisation (Concept™-to-drawing)
 - Move items
 - Paste items
 - Synchronisation (drawing-to-Concept™)
 - Use of module reports (CAD layouts)

Relevant queries to be answered throughout the course.

Certification

A certificate will be issued to all attendees upon successful completion of the course.
