

Enhance corporate wellbeing with CAFM technology from FSI

Is your current FM service visible only to your fellow FM professionals?

Do you want to encourage your entire workplace community to contribute to the success of the facilities they occupy?

Concept Advantage from FSI is a suite of Apps, designed to encourage the entire workplace community to contribute to the success of the facilities they occupy.

Connecting Concept Evolution CAFM to the business via end users and their mobile devices, the Concept Advantage apps extend FM beyond the core managers, operatives and suppliers who formally manage it.

The Apps and their container can be branded to make them your own. Functionality can be tailored to suit end users.

Effective and successful FM is put directly in the hands of all those on the receiving end, promoting a positive workplace environment.

Apps include:

- **Chat Log:** sociable facilities helpdesk experience for use by end users 
- **Our Say:** community suggestion and voting tool 
- **My Visitors:** pre-book in a visitor and receive notifications of arrival 

Engage your entire workplace community and encourage corporate wellbeing with Concept Advantage apps.
